

Senior Software Engineer

At J2 Health, we know that healthcare is complicated and falls short of the experience and outcomes consumers deserve. J2 exists to enable higher value healthcare. We are a team of industry insiders and technologists laser focused on transforming a critical, and underserved part of the ecosystem - provider networks.

As individuals, it's difficult to find the right doctor that meets our medical and personal needs, at affordable costs. Doing their best with unreliable data and disjointed manual processes, healthcare organizations struggle with this too as they decide which doctors should be included in-network on our health insurance plans.

J2 Health brings together best in class data and purpose built software to enable healthcare organizations to optimize provider network performance. We use our technology to power healthcare's best networks and deliver highest value care to patients.

We recently raised a \$4.5M seed round led by Primary Ventures, Tiger Global and BoxGroup and are looking for early team members interested in building a mission driven healthcare company and are not afraid to get their hands dirty.

Responsibilities:

- Work on J2's end to end application and build foundational elements to help shape our technical and product direction
- Collaborate with the product and data teams to iterate significantly on product development
- Partner with our Head of Engineering to take business requirements and translate them into actionable insights and anticipate customer needs
- Help build a strong engineering culture that will help attract top talent to join our team

Qualifications:

- 5+ years of experience building web applications & a solid understanding of web application architecture
- Experience working with JavaScript/ React and Spring Boot. Working knowledge of Java memory model and threading a must.
- Experience leading technical architecture discussions, soliciting feedback from stakeholders, evaluating trade-offs and driving technical decisions
- Background in database manipulation and management
- Previous startup and/or healthcare experience preferred but not required

Please send your resume to recruiting@J2health.com to apply.

Interested? J2 Health is committed to building a diverse and inclusive workplace. It is proven that women and people of color are less likely to apply to a job unless they meet 100% of the qualifications. If you're excited about the role's responsibilities (and feel that you'll knock it out of the park) but don't have the exact qualifications listed, we encourage you to apply!

J2 Health provides equal employment opportunities (EEO) to all employees and applicants for employment without regard to race, color, religion, gender, sexual orientation, national origin, age, disability, or veteran status. In addition to federal law requirements, J2 Health complies with applicable state and local laws governing nondiscrimination in employment in every location in which the company operates. This policy applies to all terms and conditions of employment, including recruiting, hiring, placement, promotion, termination, layoff, recall, transfer, leaves of absence, compensation, and training. J2 Health expressly prohibits any form of workplace harassment based on race, color, religion, gender, sexual orientation, national origin, age, disability, or veteran status.
